- Abstract, page 58, line 20, remove "Chosen drawing Figure 14"

### ***Allowable Subject Matter***

2. Claims 1-7 are allowed.

**Claims 1-7** are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose the following limitations:

**In claim 1**, ...bus arbitration means...creating a transmission command...an arbitration signal switching circuit that receives first and second arbitration signals...when said operation mode switching signal designates the test operation mode, exchanges the values of the first and second arbitration signals and supplies the result to said bus arbitration means; ... an output control circuit for transferring said transmission commands to said bus arbitration means ...and blocking transmission of said transmission commands to said bus arbitration means ...in combination with other limitations recited as specified in Claim 1.

**In claim 5**,...DS-LINK bit level encoding, producing a transmission test strobe signal...by adding arbitration signals to said strobe test signal and said test data signal...creating a first arbitration control signal and a second arbitration control signal from the outputs of said first driver and said second driver by the same processing of said arbitration signals as the corresponding processing in the normal operation mode...produce a third arbitration control signal and a fourth arbitration control signal ...and in combination with other limitations recited as specified in Claim 5.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
